May is National Arthritis Month

In support of National Arthritis Month, Mountain Hot Tub will be a sponsor for the Arthritis Walk. Stop in during our regular business hours to register for the walk or if you would like to join our team

contact Jeremiah Reece at Mountain Hot Tub.

The Arthritis Walk is a national annual fundraiser for the Arthritis Foundation. The event is also used to raise awareness of arthritis which is the nation's #1 cause of disability.

The 2008 Bozeman Arthritis Walk will be held at the Bozeman Ponds May 3rd from 9am to noon. Hope to see you there. Need more information? www.bozemanarthritiswalk.kintera.org.

Special Olympics President's Day Plunge

Every year for the President's Day Plunge we haul hot tubs and hot water to the Bozeman Ponds. It has always been a great way to support the event and we know that everyone who took a leap into the icy waters is always more than grateful for the reward of a hot tub waiting for them.

This year, Mountain Hot Tub's very own Dustin Thompkins volunteered to be a part of the event and brave the cold. Besides having a great time with everyone that showed up at the ponds, Dustin also raised money for the Special Olympics. Thanks Dustin!

Relax, We'll Do The Work

We can help you care for your spa. Here is a list of spa maintenance we provide. If you have questions or you would like a quote give us a call, we will be happy to tell you more.

Valet Service – May be scheduled weekly or bi-weekly. We check and adjust the spa's water chemistry. We clean the cover, the spa's bar top and waterline. We vacuum the spa and then treat the spa to its weekly water care regimen.

Drain & Clean – We drain the spa; clean the spa shell, filters and the cover. After refilling the spa we ensure the spa

is operating properly and then treat the spa water with your preferred water care regimen. We can also set you up on a schedule so we will automatically service your spa.

Winterization – The spa is drained and the excess water is removed from the components. RV grade antifreeze is used as an extra layer of protection for your spa's plumbing.

Start up – For a spa that has been previously shutdown or winterized. We clean the spa of any debris or antifreeze and then fill the spa. Check the spa operation and then add the start up products according to your water care regimen.

Hot Spring Think Green

Whether you bought your spa last year or ten years ago, we want you to know that your Hot Spring is the most energy efficient spa on the market. Here's why:

- Beneath the spa cabinet are multiple layers of high-density foam that minimize heat loss
- Low-amp SilentFlo 5000® circulation pump provides 24 hour filtration while using less energy to operate than a 75-watt light bulb
- Equipment compartment is designed to direct warm air generated from the pumps and heater back towards the spa water to minimize heat loss and limit the energy required by the heater
- All Hot Spring spas include a custom-fit cover with a high R-value, dense foam core that forms a tight seal with the spa shell to maximize heat retention
- The water temperature is maintained at a constant temperature, eliminating expensive heating and cooling cycles

Meanwhile, Hot Spring is also looking for ways to be more green in everyday. The manufacturing facility has already adopted these green practices:

- The extra material left over from forming spa shells is returned to the supplier to be ground up and reused
- Excess material used in the spa siding is returned to the supplier for recycling
- Metal material waste is sent to a recycling facility to reuse and repurpose the metals into new products
- Hot Spring Spas produces its own power through onsite generators, easing the burden on the local power grid
- A corporate "Green Team" meets regularly to drive environmentally-favorable initiatives, keeping the entire company focused on being Green
- Product brochures are printed on 100% recycled paper

Mountain Hot Tub is proud to sell such an efficient spa from a company that is devoted to giving back more than it takes. In our small way we are contributing what we can:

- We have programmable thermostats in our store to regulate and minimize the use of our heat and air conditioning
- Our cleaning company uses all natural cleaning products on our store
- We recycle all the cardboard used to ship our products to us
- We recycle our office paper, plastic bottles and cans
- We refurbish old spas and get them back in working order so we may find them a new home

We will continue to look for more ways to be green because it's important to us too.

Join the Club!

You love your hot tub and we wanted to give you a little something extra for being our customers and loving your tub. MHT's new Hot Tub Club is a rewards program for our favorite people ... YOU!

By being a member of our Hot Tub Club starting July 1, you can start earning points on purchases made at Mountain Hot Tub and join in on specials especially for you. By becoming a member, you can:

- √ Earn points on all of your purchases
- √ Keep up to date on our events and sales
- √ Redeem your points on your future purchases

You can join the club by sending us with your name and email address to tubclub@mountainhottub.com.

Infrared Saunas

The most recent innovation in saunas is the infrared sauna. These saunas have the same health benefits as traditional models.

The main difference is the body is heated directly and the air in the sauna stays cooler, providing a more enjoyable experience for those who dislike breathing heated air.

Stop in to see our display models. They are quick and easy to put together as well as compact and affordable.

Music Systems

You may have heard about the new hot tubs with a music system but did you know that you may be able to add a stereo system to the hot tub you already have?

The **Moonlight™** music system is compatible with all later model Hot Spring, Tiger River, Hot Spot and Solana Spas and delivers sound through two outdoor speakers attached to the spa cabinet (except on Solana models). The **Moonlight™** system has external speakers is you can use your spa to entertain at your next BBQ.

How does the music get to the speakers? With the **iCast™** system. A wireless receiver is installed in the spa and the **iCast™** transmitter sends the music to your spa from your home. Plus, it is compatible with:

- Apple iPod or Personal Music Player (e.g. MP3)
- CD/DVD Player, AM/FM Radio or TV (audio only)
- Satellite Radio or Cable Music Channels
- iTunes/audio files saved to a personal computer
- Virtually any audio device with a line out

If you bought a Hot Spring Spa that has the **SpAudio™** music system as an option you have a choice of what kind of system to put in your spa: the **Moonlight™** or the **SpAudio-Cast™** system.

The **SpAudioCast™** system also uses the wireless technology of the **iCast™** system. The difference is in the **SpAudio-ready** Hot Spring spa. The spa is designed to install transducers inside the spas cabinet turning the spa shell into a speaker. Not only do you hear the music but you can feel it too.

Either way come into the store and Jeff, Jeremiah or Dustin will be glad to show you.
